

Lelystad **Airport**

Amsterdam
Metropolitan Area

Premier airport for
business aviation and MRO
Lelystad Airport is poised
for ambitious growth.

Grow along with it!

A prime location for MRO and a prime location for you!

March 2015 marked the beginning of a special period, full of opportunities. It was then that the decision was made to turn Lelystad Airport into a preferred leisure airport, with a 2400 mtrs runway, air traffic control and a passenger terminal.

Lelystad Airport aims to become a "one-stop shop" for high-quality Maintenance, Repair and Overhaul (MRO) for business and general aviation.

An airport in the heart of the Netherlands which has many of the top-notch facilities of a major airport as well as pilot training programmes and recreational aviation: That is the textbook definition of a prime location for MRO. And if you are active in the high-end MRO industry, we have the perfect location for you too – Lelystad Airport's business park is very spacious, with a direct link to the taxiway! Lelystad Airport can be the launch pad for growth.

**Lelystad Airport is poised for ambitious growth.
Grow along with us!**

'The provision of exceptional customer service lies at the heart of our organisation.'

Roy Klockenbrink, Aviocom

These visionary companies have already chosen Lelystad Airport

Top-notch businesses in the MRO industry have already chosen Lelystad Airport. For example:

Quality Aircraft Painting Services (QAPS), member of the STTS Group: top-quality painting for business aviation and regional aircraft.

SPECTO Aerospace: top-quality PART 145-certified composite repairs and manufacturing.

AIS Airlines: top-notch pilot training, including a fully-fledged simulator (Jetstream/B737) as well as an ACMI operator with 12 turboprops and selected PART 145 MRO services.

Aviocom: brings single-source procurement solutions to the aerospace industry and is the comprehensive distributor of Specialty Chemical Compounds.

Aircraft Maintenance Netherlands (AMN): EASA PART 145 MRO for light and mid-sized aircraft.

Lelystad Airport, the ideal location for you

Lelystad Airport business park has a direct link to the taxiway, which makes it a prime location especially for the high-end MRO industry. In addition, there is Airport Garden City business park, which offers another 92 hectares located within a stone's throw of the airport.

Lelystad, situated in the Amsterdam Metropolitan Area, is the ideal location for:

- companies working in the MRO industry
- logistics companies
- aviation-orientated companies
- manufacturing companies
- large-scale leisure companies

Milestones

31 March 2015

Royal Decree: Lelystad Airport is to become a fully-fledged overflow airport for Amsterdam Airport Schiphol

1 January 2016

Contract awarded for the first stage of construction

April 2018

Holiday flights and scheduled services - up to 45,000 movements - in addition to general aviation

- 2400 x 45 mtrs runway
- air traffic control
- passenger terminal

The Netherlands: an excellent base

The Netherlands is a hospitable country with a favourable economic climate and lots of benefits for you:

- a strong aerospace tradition (Fokker aircraft)
- a thriving aviation industry, with many pre-eminent companies and research institutes
- internationally-orientated
- highly trained and motivated staff with an excellent command of English
- the ability to provide full certification for aircraft and aircraft components
- a competitive tax climate which supports entrepreneurship and foreign investment

The region: infectious productivity

The Amsterdam Metropolitan Area is one of Europe's top 5 strongest economic zones. It has an excellent knowledge infrastructure and a highly-educated, internationally-minded population. The extensive industry makes the region into an environment with an infectious productivity, already home to highly-acclaimed and distinguished businesses such as:

- National Aerospace Laboratory: the primary institute for aerospace research in the Netherlands, which, among other things, provides support to aerospace companies.
- 3D Metal Forming: produces large, complex and double-curved shapes for the machining of items including aerostructures.
- Dutch Thermoplastic Components (DTC) Almere: a custom moulder of continuous fibre-reinforced thermoplastic polymer components. 90% of DTC's customers operate in the aerospace industry.
- SCALA: facilitates the connection of technology and aviation-related companies' demand for trained staff to appropriate and tailor-made education services.

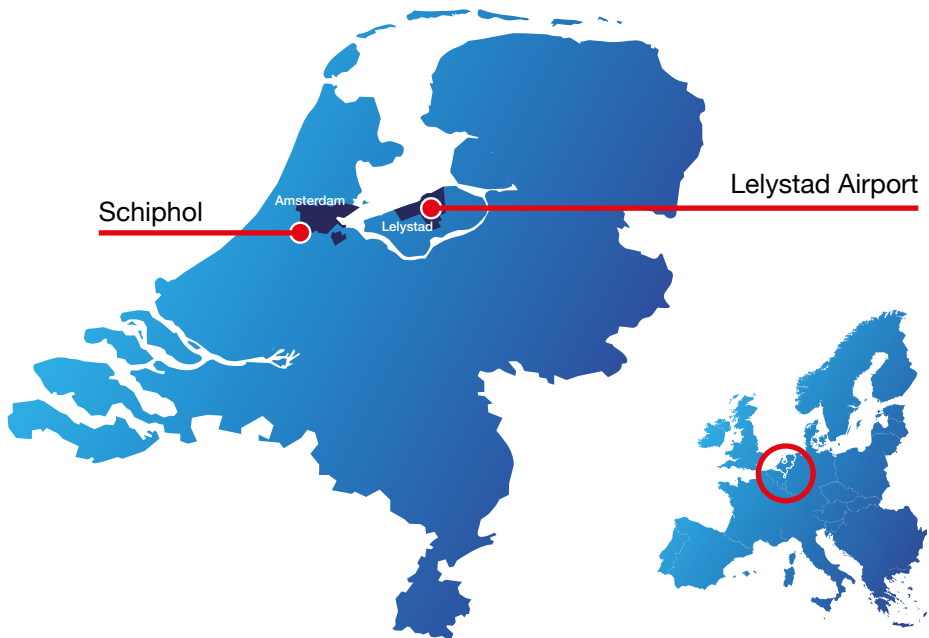

'Flevoland Province
is 100% behind the
development of
Lelystad Airport.'

Leen Verbeek, King's Commissioner
of the Province of Flevoland

Lelystad: direct connections in all directions

Lelystad Airport is located in the heart of the Netherlands and together with Amsterdam Airport Schiphol is the gateway to the Amsterdam Metropolitan Area. Not just by air, but by car, train and ship.

- Motorways in all the cardinal directions
- Lelystad railway station, providing connections to an extensive railway network
- Container and transshipment port: to be completed in 2017

Lelystad: an excellent place to live

- A spacious city rich in forests and areas of natural beauty
- All the amenities of a large city
- The bustling metropolis of Amsterdam on your doorstep (only 45 min away by car)
- The area is a popular tourist destination

Lelystad Airport has everything going for it!

Lelystad Airport is ready for the growth spurt and has a bright future ahead. Because it has everything going for it:

- already the largest airport in the Netherlands for general aviation
- twinned with Amsterdam Airport Schiphol
- the future: one-stop shop for MRO, preferred leisure airport and centre for business aviation
- plenty of space: two business parks, of which one has a direct link to the taxiway!

Ready for take-off!

Lelystad Airport business park and Airport Garden City business park: that's more than 100 hectares of growth potential.

Are you ready for take-off?

Discuss the opportunities that await you now!
